WORK EXPERIENCE

MAIN PROJECT ' MY STARTUP Aug 2022 - Present

Foozy MERN stack Product Development Figma Canva

- Built and launched a food preordering platform in 4 months:
 - Empowered over 5 local vendors to collect online orders.
 - Executed a successful pilot run for 40 days, Partnered with with 2 real shops and serving 300+ happy customers.
 - Achieved sales of INR 50,000 during the pilot run, achieving a 20% increase in revenue for participating vendors.
- Technology and Design:
 - Leveraged Next.js and Tailwind CSS to build a highly interactive and user-friendly interface, resulting in a 30% reduction in order processing time.
 - Executed the backend using Express.js and MongoDB, enhancing data management and achieving a 40% improvement in system performance.
 - Crafted the UI/UX using Figma, resulting in a 50% decrease in user complaints and a increase in customer satisfaction.
- Deployment and Collaboration:
 - Rolled out the frontend on Vercel, backend on Railway, and database on MongoDB Atlas, ensuring a reliable and scalable platform with 99.9% uptime.
 - Performed user research and obtain feedback from 50 users to persistently refine the platform's user experience.

MINI PROJECTS Jan 2023 - Present

Freelance Next.js TailWind CSS Communication

- Collaborated with over 20 diverse clients to:
 - Enhanced conversational skills and styling abilities.
 - Exceeded requirements and facilitated clear communication.
 - Nurtured creativity and remained abreast of design trends to deliver exceptional results across industries.

FRONTEND DEVELOPER Aug 2023 - Present

MapUp Structured work Team Work Pair programming

- Collaborated with data and development teams to:
 - Launch project MVP, gather feedback from 50 customers,
 - Employ an industry-standard plugin for Motive marketplace.
 - Ensured that it was scalable at least up to 10,000 users, by using a combination of AWS and mongoDB for data storage and processing.
- Created 1 map to visualise Toll data:
 - Visualising the high-quality toll boundaries for the visible region and low-quality boundaries for the rest of the map.
 - Gained 580% faster loading time.
- Refactoring the TollGuru dashboard from WordPress to Astro:
 - This was crucial for faster loading, clean and consistent UI.
